

# IDC Health Insights: Asia/Pacific Healthcare Digital Transformation Strategies

AN IDC RESEARCH ADVISORY SERVICE

---

The *IDC Health Insights: Asia/Pacific Healthcare Digital Transformation Strategies* service provides an overview of regional and country-level digital strategies various health-related entities are undertaking currently. It offers insights into the future of healthcare delivery and how the ecosystem of medical device and life sciences companies, hospitals, and health insurance payors will affect its transformation. The program will also cover information and communication technology (ICT) spending for the market areas of health providers and life sciences.

---

## Approach

The *IDC Health Insights: Asia/Pacific Healthcare Digital Transformation Strategies* service develops unique and comprehensive analyses of data, based on annual surveys and analyst expertise, focused on providing actionable recommendations targeting the value-based healthcare system. Ongoing communications with industry experts, health industry stakeholders, and technology vendors, complemented by secondary research from conferences, publications, and third-party news sources, bolster the actionable content. To ensure relevance, our analysts work with subscribers to identify and prioritize specific topics to be covered in research reports.

---
